

GPS FMS ECLIPSE PLUS

The Eclipse Plus weatherproof asset and trailer tracking product is designed slower-moving, long-term, no power available style deployments. The Eclipse Plus large battery pack makes it an ideal solution for managing assets that are normally not connected or not able to be connected to a power source for extended periods of time. The Eclipse Plus is a complete vehicle tracking and communications device incorporating next-generation, super-sensitive GPS technology on LTE cellular networks (3G Fallback) for installation in or on nearly any type of asset. The Eclipse Plus is the perfect solution for assets that only need to check in 1 time every day, but can also check in when the asset is in motion and update every hour while in motion. Superior internal antennas for both cellular and GPS and make the Eclipse Plus mountable virtually anywhere on the vehicle for easy, inexpensive installations.

Key Features:

- Optimal for assets that rarely have power available and frequent communication is not necessary to track.
- Perfect for assets that need multiple daily check-ins
- Configurable report programming to provide tracking while keeping reporting frequency as low as possible to maximize battery life.
- Can be configured to report on motion and/or various time intervals
- Rugged, sleek, weather resistant design
- No wiring needed! Simply mount the device and it's ready to track
- Wireless sensors available for additional tracking requirements.

Dimensions:

- 3.19 x 1.97 x 7.99"

Weight:

- 17.6 oz

Cellular Connectivity:

- LTE Cat-1 (3G Fallback)
- IP/Ingress Rating:
- IP-67

Estimated Battery Life:

Up to 10 Years at 1 Report per Day
