

The GPSFMS Star-Lite cellular asset tracker is the latest in LTE Cat M1 cellular technology, drawing very low power to ensure a long battery life.

Track, monitor, and manage a wide variety of mobile and fixed assets in different environmental conditions. Ideal for trailers, heavy equipment, shipping containers, ATVs, rail cars, and more. Replaceable Lithium Ion "AA" size batteries make this device a reliable tracker for many years of service.

Key Features:

- Newest, LTE Cat M1 technology to keep you on the cutting edge
- Simple installation. Just attach to your asset and go!
- Extremely small footprint at under 5 inches.
- The most competitively-priced asset tracker you can find, maintaining the quality you expect from GPSFMS
- Great for trailers, heavy equipment, shipping containers, atvs, etc.
- Configurable to report more frequently than other asset trackers
- Customize reports and alerts, taking advantage of its long battery life and increased location update cycles
